

EMERGENCY COMMUNICATIONS PLAN RESIDENT, CLIENT & FAMILY Guide (as of November 2017)

This guide briefly explains the Emergency Preparedness Program in place at Bailey-Boushay House.

The Emergency Preparedness Program, which includes an Emergency Operations Plan, is a comprehensive approach to meeting the health and safety needs of our resident population and provides our staff with guidance on how to respond to emergency situations that could impact the operation of the facility, such as natural or man-made disasters.

This guide details expectations of residents and their families during an emergency event at the facility or a community disaster.

The guide also provides families or responsible parties with alternate methods to contact the facility during a disaster when normal means of communications (telephones) may be inoperable.

COMMUNICATIONS DURING AN EMERGENCY

Staff members will communicate in person with residents, clients and families when there is an emergency or disaster.

Typically normal telephone communications will occur between Bailey-Boushay House and family members or responsible parties when there is an emergency that impacts the operations of the facility.

In the event of a disaster or other event that causes the loss of normal telephone communications, the facility may make alternate arrangements to contact resident families or responsible parties through the use of cell phones or other means.

If telephone communications (normal and cell) are inoperable the facility may share information relative to the status of the facility or disaster on its webpage at bailey-boushay.org or our Facebook page at facebook.com/BaileyBoushay/

ABOUT OUR EMERGENCY OPERATIONS PLAN

- A detailed plan containing emergency procedures (reviewed and revised on an annual basis) that the staff follow for various emergencies.
- Staff are trained each year on the Emergency Operations Plan and on Fire Procedures.
- Fire Drills are conducted on a regular basis at varying times to ensure the fire alarm system is operational and to evaluate staff response upon alarm activation.
- Disaster Drills are conducted to evaluate staff knowledge, response and competence.

HOW WE ADDRESS DISASTERS

Establishing Emergency Operations Center (EOC)

- The Leadership team will establish a Emergency Operations Center for more serious incidents to provide guidance to staff and to communicate with emergency responders and agencies.
- Information and direction will be provided to residents and families as soon as possible – please be patient.
- The safety of the residents, clients, volunteers and staff will be a priority.

Sheltering in Place

- In many incidents it may be safer to shelter in place, remaining in the building following the direction of staff.
- The facility maintains emergency supplies consisting of food, water and other supplies in the building.
- When power is lost there is an emergency generator that will provide limited power to critical areas.

If Forced to Evacuate the Building

- Evacuation of a healthcare facility is rare however the facility is prepared to do so if necessary for the safety of the residents.
- If the facility is forced to relocate or evacuate residents the release or sharing of resident information with other healthcare facilities and emergency agencies may be done as permitted by law.
- If we are forced to evacuate Bailey-Boushay House we will relocate to Virginia Mason Medical Center's main campus in the First Hill Neighborhood of Seattle.

How We Will Evacuate

- Residents will be prepared for evacuation by assigned staff. This may include collection of certain personal belongings, medications and other articles deemed necessary by staff. Typically these items are placed in a labeled bag and accompany the resident to the evacuation destination.

OUR FIRE PROCEDURES

- Staff receive annual Fire Safety Training. This “hands on” training includes:
 - What to do if they discover a fire
 - How to rescue a individual from the fire room or area
 - How to use a fire extinguisher
 - Evacuation of the fire area
- The fire procedures are reviewed and revised on a regular basis.
- Fire drills are conducted on a regular basis.

For More Information or to review our plans in detail contact our Administrator/Executive Director Brian Knowles at (206) 240-3269 or brian.knowles@virginiamason.org.
